

## Daikin Europe NV is hiring engineers at his European HQ

### About us

Daikin Europe NV is a **leading manufacturer and supplier** of heating, ventilation and air conditioning equipment, including heat pumps and refrigeration. We are devoted to providing high-quality products and total climate solutions to create comfortable and sustainable interior environments for all of the people and regions of the world.

### What Daikin stands for

#### *Inspiring Innovation*

Are you as determined as we are to find solutions? As a **market leader** in energy efficiency, we believe our progressive approach to product development delivers an unparalleled quality and versatility to our integrated solutions.

#### *Personal Development*

We believe top-quality products and services are delivered by **talented individuals**. That is why we choose to invest in **personal development** and offer opportunities for growth throughout your career.

#### *Daikin community*

It's important to **have fun at work**. Conviviality and teamwork make for strong connections between colleagues. We'll make sure you will immediately feel at home.

### What we are looking for

- Masters with a degree in **engineering** (electro-mechanical, mechanical, electric, electronics, ...)
- Knowledge of both spoken and written **English** is essential.
- Willingness to **relocate to Belgium** (Ostend)
- Both recent graduates as well as candidates with experience.
- A **team player** with good communication skills
- A **problem solver** who is able to work in an autonomous manner and who take initiative
